

# ABOUT ASBESTOS-RELATED DISEASES

## WHAT IS ASBESTOS?

- Naturally occurring fibrous mineral that is a recognized **carcinogen**
- Once valued as a **fire and chemical resistant material**, it was widely used in the construction, automotive, military, marine, and manufacturing industries
- When it is cut or crushed, the **fibers can be inhaled or ingested**
- **Asbestos exposure increases risk for developing disease of the lungs, chest cavity, and abdomen**

Asbestos fibers are:

**INVISIBLE**

**ODORLESS**

**TASTELESS**

## PLEURAL PLAQUES:

**Pleural plaques** are the most common condition that results from asbestos exposure. **They are benign patches of fibrous thickening on the pleura (lining of the lungs), which can eventually calcify.**

Pleural plaques do not generally produce notable symptoms.

They are diagnosed using a chest x-ray or CT scan.

**Pleural plaques do not progress into lung cancer or mesothelioma.**

## ASBESTOSIS:

**Asbestosis is a chronic respiratory disease caused by prolonged exposure to asbestos.** The inhaled fibers can lodge deep in the lungs, leading to **fibrosis (scarring) and stiffness of the lungs.**

The most common symptoms are **shortness of breath and a persistent, dry cough.**

It is diagnosed through a physical exam, chest x-ray, and lung function tests.

**Asbestosis does not progress into lung cancer or mesothelioma.**

## LUNG CANCER:

**Asbestos-caused lung cancer originates in the lung itself.** It is comprised of different cancer cells than those associated with pleural mesothelioma, and thus is a completely separate cancer.

In general, the greater the exposure to asbestos, the higher the risk of lung cancer. **The risk is also much higher among asbestos-exposed smokers.**

The most common symptoms are **chest pain, coughing, difficulty breathing, fatigue, and weight loss.**

It is diagnosed by a pathologist through a biopsy.

If you have been diagnosed with an asbestos disease, O'Brien Law Firm will provide a full case evaluation at no cost or obligation to you. Contact us today.
